

## Fast, High-Definition Video Intercom

### Convenience and peace of mind.

Whether you want to see who is at the front door, check in on your sleeping baby, or call everyone to the table for dinner, the Control4 Video Intercom makes it simple and convenient with an incredibly fast connection speed and high-definition clarity. And all of this functionality is automatically enabled on every new Control4 touch screen.

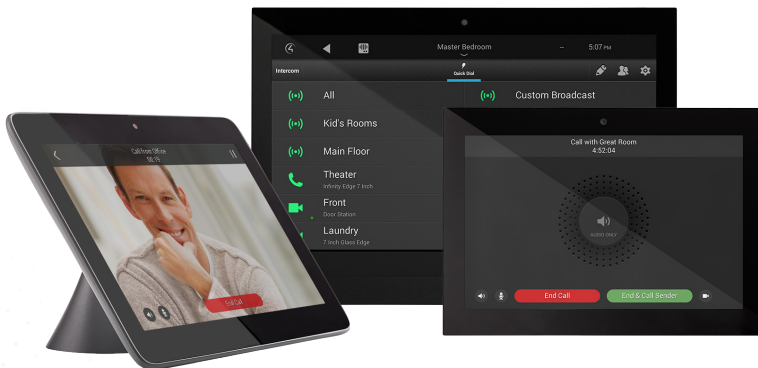

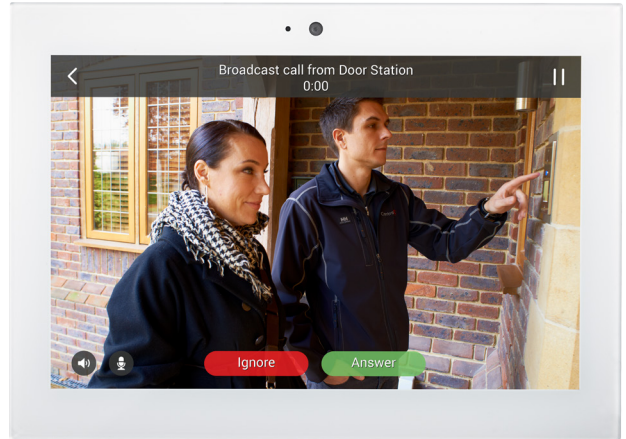

### Control over privacy

Perhaps you want audio-only in the bathrooms, video functionality available at pre-set times and in specific rooms, and the do-not-disturb setting activated during certain hours of the day. Your video intercom experience is under your complete control.

- Room Privacy Settings
- Monitor Mode
- Auto-Answer
- Do Not Disturb
- Audio-Only
- Broadcast
- Rooms & Groups

## Maximize convenience

Alternate camera views provide you with the best viewing angle for each station. And since the intercom solution also communicates with 3rd party, SIP-enabled products, including door stations, phones, and mobile apps for iOS & Android when connected to the same network, you can even connect with a guest at the front door while you're in the backyard.

## Powered by bold, fast new touch screens

Sleek and sophisticated, our new touch screens provide an intuitive, elegant and dedicated interface to your Smart Home. Browse a music library with a simple swipe, display bold cover art, and easily personalize a lighting scene. Tabletop or in-wall, black or white, these touch screens are sure to complement the beauty of your home.
