

# Introducing Chime.

The first video doorbell built for the truly intelligent home.

Control4 Chime Video Doorbell leverages the power of your Control4 Smart Home to provide greater security and keep you connected and in control like no other video doorbell.

Now, you can see and talk to a visitor at the door from the Control4 App or Touchscreen while simultaneously unlocking the door, turning on the lights, disarming the alarm, or opening the garage. And whether you're home or away, receive notifications on your smartphone when motion is detected or the doorbell is pressed.

No other video doorbell offers this level of integration with Control4.

# Your home. Simplified.

A Control4 Smart Home connects the audio, video, lighting, cameras, and other technology in your home into one simple-to-use system that makes your life more convenient and your home safer, more comfortable, and easier for the whole family to enjoy.

# Hi there.

# A more powerful smart home experience.

## From your smartphone:

- See and talk to visitors using the Control4 App—whether you're at home or away.
- Get an instant notification that a package has been delivered even if the bell is not pressed.
- When the bell is pressed, answer from your phone and provide instructions on where to leave the package. Unlock the door for the package to be placed safely inside and then lock it again.
- If you're running late, answer a guest's ring and disarm the alarm, turn on lights, or open the garage for them to enter.

## Automatic events can happen, as well:

- Receive a snapshot whenever someone steps onto the porch—and *only* when they step onto the porch.
- When Chime senses movement in the driveway after dusk, it can begin recording, activate exterior lights, and ensure all doors are locked.

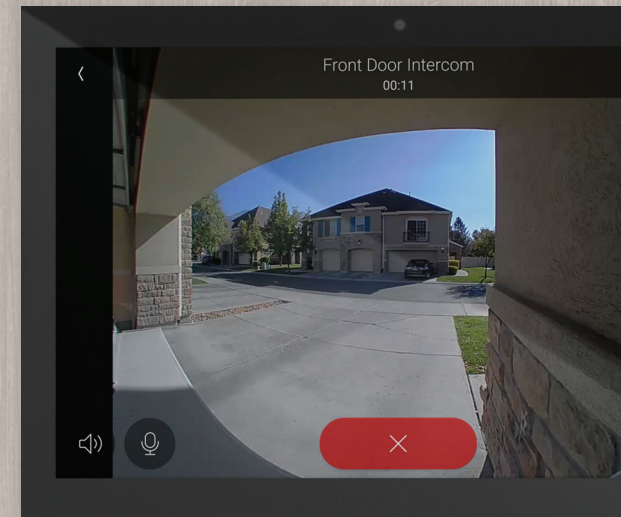

The perfect blend of engineering and elegance.

- Crisp, natural two-way audio and sharp 5MP image and video quality for user-friendly communication.
- Night mode enables clear picture in low-light settings.
- Sprawling 180-degree field view allows you to monitor more than just the porch.
- View seven days of snapshots and video recordings on your phone and touchscreens.
- Personalize up to five motion zones with customized sensitivity control, ensuring you're notified when it matters most.
- Available in beautiful black and nickel finishes for a luxurious appearance.

# Control4 Touchscreens.

The perfect companion for Chime.

- A large, high-resolution screen to automatically see who's at the door from across the room without getting up to search for your phone.
- When Chime is pressed or motion is detected, video can be displayed on Control4 Touchscreens throughout the house, making it easy for everyone to see who's at the door.
- If family members are not answering their phones, call into any touchscreen within the house from the Control4 App to quickly video-connect.
- Multiple, high-quality speakers and microphones make clear communication effortless from across the room, with visitors at the door or with the entire family.
