Release Notes: Luma X10 IP PTZ Camera Firmware

V5.5.6 build 201111

Priority: **REQUIRED**

Released: 2021/02/10

Models Affected

LUM-310-PTZ-IP-BL   LUM-310-PTZ-IP-WH   LUM-510-PTZ-IP-WH

Enhancements

1. Support for Chrome, Safari, and Edge browsers on both PCs and Macs without the need for plugins. Internet Explorer continues to use a plug-in.

Issues Resolved

1. Fixed IR sensitivity issues, including resolving image degradation issue, IR on/off issues in low light, and IR not turning on when there is enough light.

2. Fixed auto tracking issues where the function would stop after a few days or not work in cases where it should focus and track.

3. Added LumaLink enable/disable function in web UI.

Known Issues

1. Grey screen on Live View on plug in free browsers when the PTZ camera is connected to the back of the NVR PoE port.

2. Latency issues with PTZ cameras/control on plugin free browsers.

3. Web UI font size changes on plugin free browsers.

4. The camera does not respond to the first command via the touch screen; it does respond to the subsequent commands.

5. If PTZ cameras are left in the background the device does not reconnect when bringing back the app. User must go to devices and connect again or close/re-open app.

V5.5.6 build 190924

Priority: **INSTALLED**

Released: 2020/01/30

Models Affected

LUM-310-PTZ-IP-BL   LUM-310-PTZ-IP-WH

Issues Resolved

1. This is the first release firmware.

Known Issues

1. None we are aware of.

V5.5.6 build 190882

Priority: **INSTALLED**
