

Smart home solutions

Control 
Better. Together.™

Whether your home is one or one-hundred, it can still have a brain! Control4 solutions are ideal for new construction or existing homes, no matter how old they are.

Living life, automatically

Imagine. One touch on your tablet and the movie starts, your shades close and the surround sound kicks in at the perfect volume. When the sun goes down, your porch light turns on. And the whole house locks at 11 p.m. Automatically.

You rush out with the kids to drop them off at school. By the time you get to the office you wonder, "Did I close the garage door?" Simply check from your smartphone and relax.

Imagine living in a home that obeys your every command...where virtually every device and system can be controlled remotely and fully automated. You can use your tablet to control your home theater, dim the lights, lock the doors, turn up the heat, and arm the alarm. Or your smartphone to do the same from not just anywhere in your house—but from anywhere in the world.

Welcome to Control4® automation, a smart automation solution for homes and businesses that makes it easy for you to intelligently control every aspect of your home—from TVs to thermostats, door locks to drapes—no matter where you are, using one simple-to-use interface. Control4® solutions make your life more comfortable, more efficient, and more secure.

Best of all, Control4® technology gives you the power to personalize your home or business with the home automation system of your dreams—all within your budget.

The genius of the smart home

The brains

It all starts with a controller, the central hub of every Control4® system. The controller runs the operating system for your home, giving you the power to control and automate virtually any home function, including your home theater, music, lighting, temperature, security system, appliances and more.

Each model allows you to build anything from a basic home theater system to a whole-home automation solution. Sleek designs make them easy to either place behind a TV or mount in a rack, so they're always out of sight. Additionally, controllers offer features such as audio streaming, intercom capability and effortless control of your favorite consumer electronic devices.

Control4® HC-800
Blazing fast, powerful, and flexible. The cornerstone for every control system.

Control4® HC-250
Perfect for control from your TV or for one-room systems.

The beauty

What makes Control4 products so easy to use is our intuitive, elegant user interface, which is virtually the same on every device.

For the family room, you may prefer a remote that gives you total control of the house right from your TV. In the kitchen, you might prefer an elegant in-wall touch screen that makes it easy to monitor the house at all times. Or with the Control4 App, control everything from your iPad, iPhone, Android tablet or PC.

Through the Control4® interface, it's easy to control and automate virtually any home function—even from a light switch. That's genius!

Goodbye cineplex, hello Control4

You can transform your family room into a state-of-the-art home theater—and have the foundation for what you need to ensure your smart home can keep getting smarter. Watch TV, access your Blu-ray™/movie collection, or enjoy your entire music library using your smart phone, tablet, or an easy-to-use remote. All it takes is one tap to have the shades close, the lights fade, and the receiver kick in at the perfect volume.

- Automate your home theater experience with one-touch control
- Access your home control system through your TV
- Send HD video to any room in the house
- Watch video from multiple sources, including media players, hard drives, and portable devices—or browse through them all simultaneously

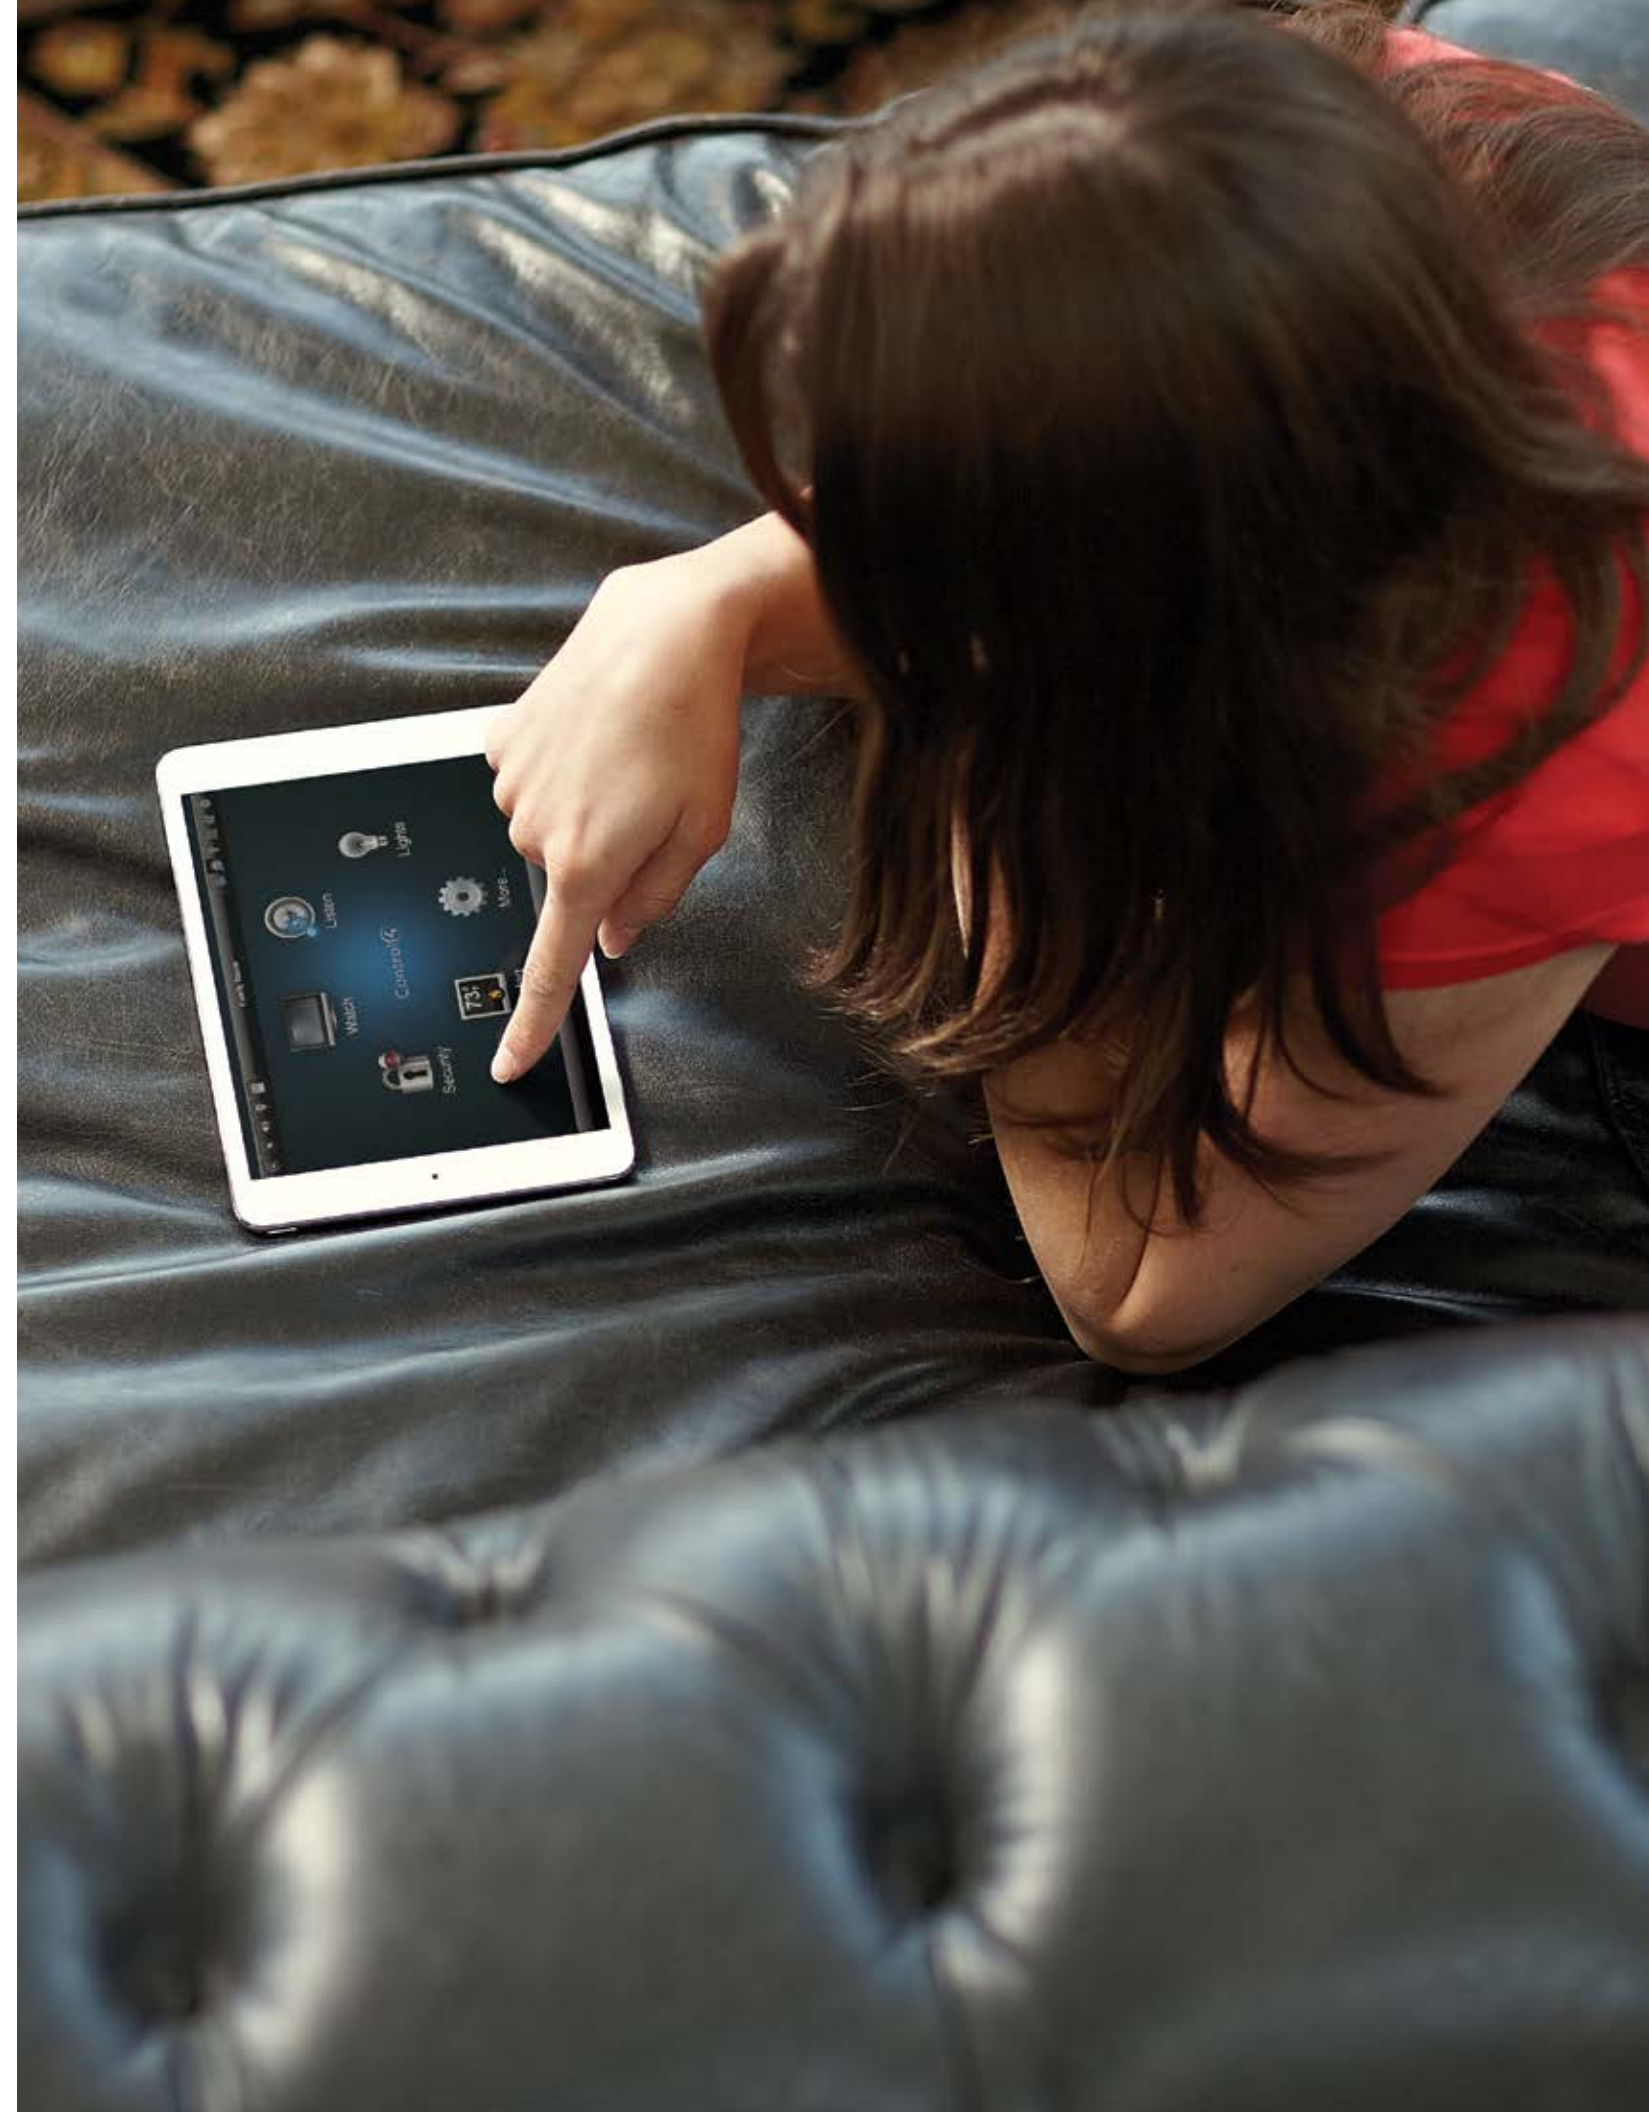

Eliminate the need for multiple remotes. Control4 solutions simplify the control of everyday audio, video and home theater components.

Your music, your way

With unprecedented control over your audio, Control4 technology will change the way you listen to music—forever. The intuitive user interface makes it a breeze to browse through your music collection and play any song you want, at any volume, in any room in the house.

- Hear classical in the den, jazz in the kitchen, and rock in the teen's room—all at the same time
- Play songs from your favorite streaming services, like Spotify® or Pandora®; SiriusXM™ satellite; or your iTunes® music library
- Distribute amplified music to different areas in the house with multi-zone amplifiers
- Send music from virtually any source, including your smartphone or tablet, to any room in your house with the Control4® Wireless Music Bridge; even guests can stream music throughout your home

Smart lighting is a bright idea

Whether you want the perfect ambiance in every room, one-touch control, or just an effortless way to save energy, Control4® home automation is the simple solution: total control over every light in the house—from across the room or across the globe.

- Have the lights in the house turn on automatically to welcome you home
- Use motion sensors to provide hands-free illumination in the dark
- Turn off all lights with a single touch—except for the kids' nightlight
- Program the lights to shut off automatically when a room is unoccupied

Combine lighting with curtain control and the whole house looks occupied, even when you're away. Or tie it into your home theater system so the drapes close automatically as the lights dim. You can control lighting scenes throughout your home from a central keypad or touch screen—no more dashing through the house to flip switches. And don't even think about construction hassles. With a Control4 system, you can turn any standard outlet into two smart outlets, ready to control just about any electrical device. It's really that easy.

Control4® keypads make it easy to set a mood or save energy in one touch.

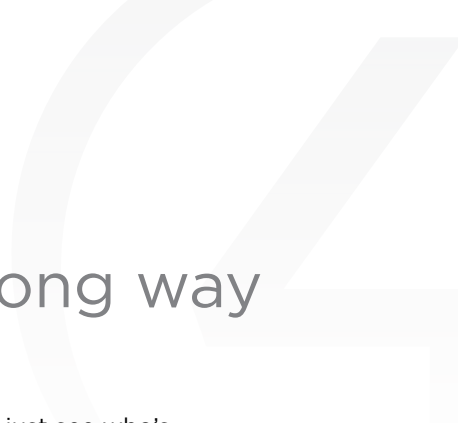

Be comfortable, save energy

With Control4 automation, it's easy to save energy and money without compromising comfort.

During summer months, you can set the air-conditioning to switch off automatically when no one is home. Come winter, a smart fireplace switch can provide additional heating to keep the house cozy even on the coldest of nights. And on the evenings you find yourself late at the office, just hop online to adjust your thermostat levels so the heat doesn't kick on until you're a little closer to home.

- Replace your current thermostat with a Control4® Wireless Thermostat to keep your home at a more energy-efficient temperature while you're out
- Program your shades to close during the brightest hours of the day
- Use dimmers, timers and occupancy sensors to reduce energy waste
- In case of a fire, have sensors automatically shut down the HVAC system to contain smoke and flash lights outside your home to signal help

A little peace of mind goes a long way

If you want to know what's happening at home when you're away on business or just see who's at the front door, no problem. The Control4 system incorporates your lights, locks, and more to automatically make your home more secure. And with the Control4® 4Sight™ Service, "being home" is as easy as picking up your phone or hopping on your computer.

- Lock every door and arm the alarm, all with a single touch
- Check on the kids, whether you're downstairs or downtown
- View the video feeds from your security webcams—any time, anywhere
- Receive a text alert when the Control4 system senses trouble at home, including water leaks
- Assign temporary security codes for deliveries and service workers
- Let yourself in when you forget your keys
- Randomize lights and A/V equipment to make it look like you're home even when you're not

24/7 home monitoring and control from your favorite mobile device your Control4 system keeps you in-the-know with email or text alerts based on actions at home.

Control4 automation works with most smart locks and alarm systems to give you full control from any touch screen or wireless device.

Smart products, smart home

Interfaces

A variety of intuitive Control4 interfaces let you control your lights, temperature, movies, music and much more. Or you can turn your iPad, iPhone, Android tablet, smartphone or PC into a Control4 interface with the Control4 App.

Control4® 4Sight™ Service

Check in on the house from anywhere. Forgot to close the garage door. Do it from your phone. Receive email or text alerts in case of a water leak, intrusion, fire or even when your teenager gets home. And take action to correct it, from the beach or the boardroom.

Controllers

Controllers are the central hub of every Control4 system. Each model gives you powerful control over your entire home and enables you to build your dream home-control system over time.

Lighting

Control4® dimmers and switches easily replace existing light switches, or plug into outlets to offer complete control of your lights and electronic equipment without construction hassles.

A/V

From switches to amps, speakers to media players, Control4 offers multi-room music and video products that make it easy to enjoy your favorite entertainment from anywhere in your home.

Climate

Advanced temperature control is a simple and affordable addition to any home with Control4 automation. By automating systems to conserve energy, you can control your energy costs—when you're home or away.

Smart products, smart home

Security

Control4 works with leading companies to keep your home more secure. Choose from products that easily integrate with your Control4 system, including locks that can be monitored and managed from any home or Internet connection.

Control4® Operating System

Powerful, flexible, scalable. The Control4® controller with its powerful OS gives you mobile control and audio/video intercom capability, plus the power to update and add to your system whenever and however you like.

Control4 App

Turn your iPad, iPhone, Android tablet,* smartphone or PC into a control interface for your house with this easy-to-use app. The Control4 App makes it easy to control just about anything in your house from virtually anywhere.

*See device compatibility at control4.com/app

Why Control4?

We're a proven leader

We train and certify our authorized dealers to install intelligent, open, and affordable automation solutions that will work in homes, businesses, and major hotels all over the world. You can be confident we'll be a great addition to your home too.

We believe in choice

Control4 is an open platform. That means we embrace standards and work with the industry's most innovative third-party developers to ensure you always have choices when it comes to the devices, apps, and products you want to control. It also ensures you'll enjoy your investment well into the future.

We think way beyond a box

We revolutionized home automation when we introduced the first affordable intelligent control solution. Every year, we innovate more with new products that speak directly to the needs of our customers. You can expect the great ideas to keep on coming.

Make your home a smart home

Control4 is not a product or technology company. We're a lifestyle company, inspired by ideas that promise more comfort, convenience, security and fun for people just like you!

We partner with highly-trained system designers and installers who share our vision and passion for excellence. The combination of their professional expertise and our award-winning solutions offer more comfort, convenience and control for all.
