

SILVER FLEXSUB

REMOTE-MOUNTING SUBWOOFER

SILVER FLEXSUB

REMOTE-MOUNTING SUBWOOFER

Triad's remote-mounted Silver FlexSub delivers deep, vibrant bass with minimal visual impact. These specially engineered speakers provide precise audio reproduction without the awkward bulk most bass boxes impose.

The FlexSub, named for its flexible installation, has a damped, expandable, coiled tube that mounts in a hidden area and terminates with a small grill or vent, allowing the subwoofer enclosure to be installed remotely.

These speakers can install behind a ceiling, cabinet toekick, baseboard, wall, or crawl space, allowing easy incorporation even when multiple FlexSubs are desired. A high-power amplifier and studio-grade driver provide substantial output with ultra-low distortion.

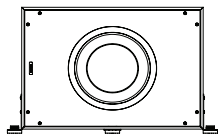

In an industry of generic, mass-produced products, Triad combines craftsmanship and customization in every order. Handcrafted in the US using the finest materials and components, Triad's fully engineered, sealed, and internally braced MDF enclosures deliver intricate acoustics and effortless playback, achieving unobtrusive elegance while retaining the integrity of sound.

FEATURES

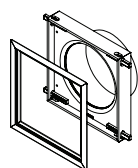

- Flexible installation with remote mounting
- High-performance 12" subwoofer paired with RackAmp700 for larger rooms
- Fully engineered, premium MDF enclosure
- Custom paint matching available
- AcoustiPerf metal grill (size S) available in three designs: Narrow, Wide, and Frameless or Vent Register (7 1/2 x 12 1/2")
- Compact and efficient—only 14 1/4" deep
- EnergyStar compliant, energy efficient
- Optimize multiple subs for best performance: Delay time aligns subs together for better impact
- Six user-selectable Preset Modes (Normal, Cinema, Night, User 1, User 2, User 3)
- In addition to common menu functions, Installer Setup Menu offers:
 - Slope adjustments for all filters at 12, 24, and 48 dB/octave
 - Multiple power on methods: 5V-20V trigger, IR with discrete controls
 - Sense: Sense on threshold, sense off in minutes
